Dear Colleagues,

Please find enclosed our detailed response to the reviewers' and action editor's comments on our manuscript entitled "*Is there a Criterion in Criterial Learning? Insights from Studying Feedback Delays*" (Manuscript #XLM-2024-0436).

We have carefully considered all feedback and made extensive revisions throughout the paper. These include a substantial expansion of the model space, clearer presentation of simulation results, reorganization of manuscript sections, and several textual clarifications. We believe these changes have significantly strengthened the manuscript and improved its clarity and theoretical contribution.

We sincerely thank you and the reviewers for the insightful comments and constructive suggestions that guided these improvements.

Sincerely,

A handwritten signature in black ink, appearing to read 'M J Crossley', with a stylized, cursive script.
